SYMBIO Biomonitoring System

ADVANTAGES of using SYMBIO System

**Early warning
system for detecting
water intake
contamination**

- the information on water quality is provided every single second,
- the system quickly and unambiguously generates a signal informing about rapid change in water quality,
- it enables you to prevent crisis situations,
- low monitoring cost,
- it is possible to establish cooperation conditions individually,
- the image of Water Supply Companies is improved.

We monitor water for over **6 million** people!

technology

in harmony **with nature**

SYMBIO is used for continuous control of water quality at intakes and it is a perfect complement to periodical water analyses. Fresh water mussels applied in the system quickly and unambiguously react to a rapid, significant, toxic change in water parameters. The system is a tool facilitating the water Producer's management process. It combines the proven, natural method with the innovative digital technology. SYMBIO sets new standards in the field of water safety.
